

Mission Statement

Just for Us is a collaborative, community-based primary care program designed to improve health and sustain independence, functionality, and well-being among Durham County's mature adults.

“I don't know what I would do without Just for Us.

They come to me when I cannot get out. ”

— 71-year-old female patient

JUST FOR US

*Promoting health
and wellness among
older adults and seniors
in Durham County*

**Just for Us is a collaboration of
Duke Division of Community Health
and Lincoln Community Health Center**

About Just for Us

Just for Us is designed to serve those with limited mobility, limited transportation, or other barriers to routine medical care in the traditional office setting.

Through regular home visits, individualized care plans, and coordination with our clients' primary care physicians and specialists, the goal of Just for Us is to enhance our clients' healthcare experience.

We offer:

- chronic disease management in collaboration with primary care physicians
- assistance with medication safety and management
- health and safety education
- assessments of need for appropriate medical equipment
- same day acute appointments in the home, when needed

Visits by a medical provider are billed to a client's insurance. A co-pay may be required. Please inquire for details.

“ I have been in the program for 10 years. The doctors and staff are friendly.

They are more or less like family. ”

— 76-year-old female patient
